### NPL Services for Examiners

Wednesday, February 2, 2005

STIC's mission is to connect examiners to critical prior art by providing information services and access to NPL electronic resources and print collections. A STIC facility is located in each Technology Center.

Most of the electronic resources listed on this site are accessed via the Internet. Please obey USPTO "Rules of the Road ([PDF](#) [Text](#))" when using Internet resources.

**IEEE TO INTRODUCE NEW BROWSER REQUIREMENTS IN 2005 ... [More](#)**

**IEEE Xplore** provides full-text access to IEEE transactions, journals, magazines and conference proceedings published since 1988 plus select content back to 1950, and all current IEEE Standards.

**FREE TO ALL:** Browse tables of contents and access Abstract records of IEEE transactions, journals, magazines, conference proceedings and standards.

**IEEE MEMBERS:** Browse or search to access any complete Abstract record as well as articles from IEEE Spectrum Magazine. Access your personal online subscriptions using your active IEEE Web Account. If you do not have one, go to "Establish IEEE Web Account" to set up an account.

**CORPORATE, GOVERNMENT AND UNIVERSITY**

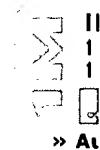

**SUBSCRIBERS:** Search and access complete Abstract records and full-text documents of the IEEE online publications to which your institution subscribes.

**Cookie**

### NPL Services for Examiners

Wednesday, February 2, 2005

STIC's mission is to connect examiners to critical prior art by providing information services and access to NPL electronic resources and print collections. A STIC facility is located in each Technology Center.

Most of the electronic resources listed on this site are accessed via the Internet. Please obey USPTO "Rules of the Road ([PDF Text](#))" when using Internet resources.

Relevance scale

**1 [Fast detection of communication patterns in distributed executions](#)**

Thomas Kunz, Michiel F. H. Seuren

November 1997 **Proceedings of the 1997 conference of the Centre for Advanced Studies on Collaborative research**Full text available:  [pdf\(4.21 MB\)](#)Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Understanding distributed applications is a tedious and difficult task. Visualizations based on process time diagrams are often used to obtain a better understanding of the execution of the application. A visualization tool we use is Poet, an event tracer developed at the University of Waterloo. However, these diagrams are often very complex and do not provide the user with the desired overview of the application. In our experience, such tools display repeated occurrences of non-trivial commun ...

**2 [The design and implementation of hierarchical software systems with reusable components](#)**

Don Batory, Sean O'Malley

October 1992 **ACM Transactions on Software Engineering and Methodology (TOSEM)**, Volume 1Full text available:  [pdf\(3.15 MB\)](#)Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

We present a domain-independent model of hierarchical software system design and construction based on interchangeable software components and large-scale reuse. The model unifies the conceptualizations of two independent projects, Genesis and Avoca, that are successful examples of software component/building-block technologies and domain modeling. Building-block technologies exploit large-scale reuse, rely on open architecture software, and elevate the granularity of programming to ...

**Keywords:** domain modeling, open system architectures, reuse, software building-blocks, software design

**3 [AGM: a dataflow database machine](#)**

Lubomir Bic, Robert L. Hartmann

March 1989 **ACM Transactions on Database Systems (TODS)**, Volume 14 Issue 1Full text available:  [pdf\(2.69 MB\)](#)Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

In recent years, a number of database machines consisting of large numbers of parallel processing elements have been proposed. Unfortunately, there are two main limitations in database processing that prevent a high degree of parallelism; these are the available I/O bandwidth of the underlying storage devices and the concurrency control mechanisms necessary to guarantee data integrity. The main problem with conventional approaches is the lack of a computational model capable of utilizing th

#### **4 Special issue on spatial database systems: An introduction to spatial database systems**

Ralf Hartmut Güting

October 1994 **The VLDB Journal — The International Journal on Very Large Data Bases**, Volume 8, Issue 4

Full text available:  [pdf\(2.50 MB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#)

We propose a definition of a spatial database system as a database system that offers spatial data in its data model and query language, and supports spatial data types in its implementation, providing at least spatial indexing and spatial join methods. Spatial database systems offer the underlying data technology for geographic information systems and other applications. We survey data modeling, querying, data structures and algorithms, and system architecture for such systems. The em ...

#### **6 Conceptual learning in database design**

Yannis E. Ioannidis, Tomas Saulys, Andrew J. Whitsitt

July 1992 **ACM Transactions on Information Systems (TOIS)**, Volume 10 Issue 3

Full text available:  [pdf\(2.00 MB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

This paper examines the idea of incorporating machine learning algorithms into a database system monitoring its stream of incoming queries and generating hierarchies with the most important concepts expressed in those queries. The goal is for these hierarchies to provide valuable input to the database administrator for dynamically modifying the physical and external schemas of a database for improving system performance and user productivity. The criteria for choosing the appropriate learning ...

#### **7 Continuous program optimization: A case study**

Thomas Kistler, Michael Franz

July 2003 **ACM Transactions on Programming Languages and Systems (TOPLAS)**, Volume 25

Full text available:  [pdf\(877.67 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#), [review](#)

Much of the software in everyday operation is not making optimal use of the hardware on which it actually runs. Among the reasons for this discrepancy are hardware/software mismatches, modularization overheads introduced by software engineering considerations, and the inability of systems to adapt to users' behaviors. A solution to these problems is to delay code generation until run time. This is the earliest point at which a piece of software can be fine-tuned to the actual capabilities of the ...

**8 Knowledge-based document retrieval in office environments: the Kabiria system**

Augusto Celentano, Maria Grazia Fugini, Silvano Pozzi

July 1995 **ACM Transactions on Information Systems (TOIS)**, Volume 13 Issue 3

Full text available:  [pdf\(2.14 MB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

In the office environment, the retrieval of documents is performed using the concepts contained in documents, information about the procedural context where the documents are used, and information about the regulations and laws that discipline the life of documents within a given application domain. To fulfill the requirements of such a sophisticated retrieval, we propose a document retrieval model and a system based on the representation of knowledge describing the semantic contents of documents ...

**10 Atomicity and isolation for transactional processes**

Heiko Schuldt, Gustavo Alonso, Catriel Beeri, Hans-Jörg Schek

March 2002 **ACM Transactions on Database Systems (TODS)**, Volume 27 Issue 1

Full text available:  [pdf\(1.22 MB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Processes are increasingly being used to make complex application logic explicit. Programming using processes has significant advantages but it poses a difficult problem from the system point of view that the interactions between processes cannot be controlled using conventional techniques. In terms of recovery, the steps of a process are different from operations within a transaction. Each one has its own termination semantics and there are dependencies among the different steps. Regarding consistency ...

**11 CROSS-DB: a feature-extended multidimensional data model for statistical and scientific databases**

Wolfgang Lehner, Thomas Ruf, Michael Teschke

November 1996 **Proceedings of the fifth international conference on Information and knowledge management**

Full text available:  [pdf\(1.02 MB\)](#)

Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

**12 A proposal for a recursive object-oriented life-cycle**

Kevin E. Carlin, Dino R. Russo, Brad Balfour

December 1990 **Proceedings of the conference on TRI-ADA '90**

Full text available:  [pdf\(1.68 MB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#)

This paper describes the recursive object oriented life-cycle which has been developed in conjunction with the authors' Object Oriented Development (OOD) methods. The basic goals that a life-cycle must satisfy are described and the recursive life-cycle are mapped back to them. A description of how the

cycle may be implemented within the framework of existing standards such as DOD-STD-2167A is included. This paper also summarizes the authors' experience with using this life-cycle ...

### **13 The design of POSTGRES**

Michael Stonebraker, Lawrence A. Rowe

June 1986 **ACM SIGMOD Record , Proceedings of the 1986 ACM SIGMOD international conference on Management of data**, Volume 15 Issue 2

Full text available:  pdf(1.91 MB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

This paper presents the preliminary design of a new database management system, called POSTG that is the successor to the INGRES relational database system. The main design goals of the new system are to provide better support for complex objects, provide user extendability for data types operators and access methods, provide facilities for active databases (i.e., alerters and triggers) a inferencing including forward- ...

### **14 A taxonomy of computer program security flaws**

Carl E. Landwehr, Alan R. Bull, John P. McDermott, William S. Choi

September 1994 **ACM Computing Surveys (CSUR)**, Volume 26 Issue 3

Full text available:  pdf(3.81 MB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

An organized record of actual flaws can be useful to computer system designers, programmers, ar administrators, and users. This survey provides a taxonomy for computer program security flaws, an Appendix that documents 50 actual security flaws. These flaws have all been described previou the open literature, but in widely separated places. For those new to the field of computer security provide a good introduction to the characteristics of security flaws and how they ...

**Keywords:** error/defect classification, security flaw, taxonomy

### **15 OceanStore: an architecture for global-scale persistent storage**

John Kubiatowicz, David Bindel, Yan Chen, Steven Czerwinski, Patrick Eaton, Dennis Geels, Ramakris Gummadi, Sean Rhea, Hakim Weatherspoon, Chris Wells, Ben Zhao

November 2000 **Proceedings of the ninth international conference on Architectural support for programming languages and operating systems**, Volume 28 , 34 Issue 5 , 5

Full text available:  pdf(166.53 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

OceanStore is a utility infrastructure designed to span the globe and provide continuous access to persistent information. Since this infrastructure is comprised of untrusted servers, data is protecte through redundancy and cryptographic techniques. To improve performance, data is allowed to be cached anywhere, anytime. Additionally, monitoring of usage patterns allows adaptation to region outages and denial of service attacks; monitoring also enhances performance through pro-active movement ...

**18 The concept of a supercompiler**

Valentin F. Turchin

June 1986 **ACM Transactions on Programming Languages and Systems (TOPLAS)**, Volume 8 Issue 1

Full text available: [pdf\(2.80 MB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

A supercompiler is a program transformer of a certain type. It traces the possible generalized histories of computation by the original program, and compiles an equivalent program, reducing in the process the redundancy that could be present in the original program. The nature of the redundancy that can be eliminated by supercompilation may be various, e.g., some variables might have predefined values (in partial evaluation), or the structure of control transfer could be made more efficient ...

**19 Slicing real-time programs for enhanced schedulability**

Richard Gerber, Seongsu Hong

May 1997 **ACM Transactions on Programming Languages and Systems (TOPLAS)**, Volume 19

Full text available: [pdf\(378.88 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

In this article we present a compiler-based technique to help develop correct real-time systems. The domain we consider is that of multiprogrammed real-time applications, in which periodic tasks control physical systems via interacting with external sensors and actuators. While a system is up and running, these operations must be performed as specified—otherwise the system may fail. Correctness depends not only on each program individually, but also on the time-multiplexed behavior of ...

**20 WireGL: a scalable graphics system for clusters**

Greg Humphreys, Matthew Eldridge, Ian Buck, Gordan Stoll, Matthew Everett, Pat Hanrahan

August 2001 **Proceedings of the 28th annual conference on Computer graphics and interactive techniques**

Full text available: [pdf\(333.39 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

We describe WireGL, a system for scalable interactive rendering on a cluster of workstations. WireGL provides the familiar OpenGL API to each node in a cluster, virtualizing multiple graphics accelerators into a sort-first parallel renderer with a parallel interface. We also describe techniques for reassembling an output image from a set of tiles distributed over a cluster. Using flexible display management, WireGL can drive a variety of output devices, from standalone displays to tiled displays ...

**Keywords:** cluster rendering, parallel rendering, remote graphics, scalable rendering, tiled displays, virtual graphics
